Subject Index of Volume 230

Adsorption
adsorption and bulk diffusion of chlorine in monoclinic lead phthalocyanine thin film gas sensors, 225
Aluminium
quasi-static and high frequency $C-V$ measurements of $Al/Ta_2O_5/SiO_2/Si$, 145
transmission electron microscopy of annealed a-$Si_{1-x}C_x$:H/Al films with different Al grain sizes, 160
Aluminium oxide
corrosion resistant coatings (Al_2O_3) produced by metal organic chemical vapour deposition using aluminium–tri-*sec*-butoxide, 138
effect of water vapor on the growth of aluminum oxide films by low pressure chemical vapor deposition, 156
Amorphous materials
characterization of hydrogenated amorphous carbon films by nuclear magnetic resonance techniques, 102
Annealing
effect of annealing on the surface and interface properties of indium oxide–silicon structures, 39
transmission electron microscopy of annealed a-$Si_{1-x}C_x$:H/Al films with different Al grain sizes, 160
Auger electron spectroscopy
enrichment in molybdenum carbides and nitrides during Ar bombardment, 28

Carbon
characterization of hydrogenated amorphous carbon films by nuclear magnetic resonance techniques, 102
Chemical vapour deposition
corrosion resistant coatings (Al_2O_3) produced by metal organic chemical vapour deposition using aluminium–tri-*sec*-butoxide, 138
effect of water vapor on the growth of aluminum oxide films by low pressure chemical vapor deposition, 156
electrical properties of thin reoxidized dual-layer oxides, 150
role of the buffer gas in the ArF laser chemical vapour deposition of silicon oxide, 35
Chlorine
adsorption and bulk diffusion of chlorine in monoclinic lead phthalocyanine thin film gas sensors, 225
Chromium
crystallographic texture and morphology of obliquely deposited Co–Cr magnetic thin films on flexible polymeric substrates, 199
Coatings
corrosion resistant coatings (Al_2O_3) produced by metal organic chemical vapour deposition using aluminium–tri-*sec*-butoxide, 138
electric and dielectric properties of a coal tar epoxy coating, 128
Cobalt
crystallographic texture and morphology of obliquely deposited Co–Cr magnetic thin films on flexible polymeric substrates, 199
Corrosion
corrosion resistant coatings (Al_2O_3) produced by metal organic chemical vapour deposition using aluminium–tri-*sec*-butoxide, 138
electric and dielectric properties of a coal tar epoxy coating, 128

Deposition process
role of the buffer gas in the ArF laser chemical vapour deposition of silicon oxide, 35
Depth profiling
enrichment in molybdenum carbides and nitrides during Ar^+ bombardment, 28
Dielectric properties
electrical properties of thin reoxidized dual-layer oxides, 150
electric and dielectric properties of a coal tar epoxy coating, 128
spectroscopic ellipsometry studies on ion beam sputter deposited Pb(Zr, Ti)O_3 films on sapphire and Pt-coated silicon substrates, 15
Diffusion
resistance changes in thin film integrated circuits caused by interdiffusion, 183

Electrical properties and measurements
electric and dielectric properties of a coal tar epoxy coating, 128
thin film characteristics of fluorine-substituted monolayers prepared by chemical adsorption from solution, 209
tunnelling in Al–silicon oxynitride–Si structures, 133
Ellipsometry
spectroscopic ellipsometry studies on ion beam sputter deposited Pb(Zr, Ti)O_3 films on sapphire and Pt-coated silicon substrates, 15
Evaporation
in situ transmission electron microscopy observation of the appearance and disappearance of channels in Al–Mn thin films, 108

Fluorescence
preparation and properties of amphiphilic polythiophene Langmuir–Blodgett films, 65
Fluorine
information about the microcrystalline structure from the IR reflection spectra of thin UV optical films: NdF_3 and MgF_2, 55
Fourier transform infrared spectroscopy
infrared study of solids and cast films of long-chain fatty acids, 203

Germanium
microstructure of pulsed laser irradiated Sn and Ge-50 at.%Sn thin films on Ge single crystal substrates, 167
Glow discharge optical spectroscopy
spectroscopic investigation into plasma used for nitriding processes of steel and titanium, 115

Hafnium
some aspects of the formation and dissolution behaviour of hafnium oxide in NaOH solutions, 10
Heat treatment
In situ transmission electron microscopy observation of the appearance and disappearance of channels in Al–Mn thin films, 108

Indium oxide
effect of annealing on the surface and interface properties of indium oxide–silicon structures, 39

Infrared spectroscopy
information about the microcrystalline structure from the IR reflection spectra of thin UV optical films: NdF_3 and MgF_2, 55
infrared study of solids and cast films of long-chain fatty acids, 203
Interfaces
density, thickness and interface roughness of SiO_2, TiO_2 and Ta_2O_5 films on BK-7 glasses analyzed by X-ray reflection, 191
effect of annealing on the surface and interface properties of indium oxide–silicon structures, 39
electrical properties of thin reoxidized dual-layer oxides, 150
Langmuir–Blodgett films of 1-t-butyl-9-hydrofullerene-60, 73
tunnelling in Al–silicon oxynitride–Si structures, 133
Ion bombardment
enrichment in molybdenum carbides and nitrides during Ar^+ bombardment, 28

Langmuir–Blodgett films
design and fabrication of optical filters using organic materials, 59
Langmuir–Blodgett films of 1-t-butyl-9-hydrofullerene-60, 73
preparation and properties of amphilic polythiophene Langmuir–Blodgett films, 65
stability and stabilization of immunoglobulin G Langmuir–Blodgett films, 70
Laser irradiation
microstructure of pulsed laser irradiated Sn and Ge-50 at.%Sn thin films on Ge single crystal substrates, 167
role of the buffer gas in the ArF laser chemical vapour deposition of silicon oxide, 35

Magnetic structures
crystallographic texture and morphology of obliquely deposited Co–Cr magnetic thin films on flexible polymeric substrates, 199
Metal–oxide semiconductor
tunnelling in Al–silicon oxynitride–Si structures, 133
Molybdenum
enrichment in molybdenum carbides and nitrides during Ar^+ bombardment, 28
Monolayers
thin film characteristics of fluorine-substituted monolayers prepared by chemical adsorption from solution, 209
Multilayers
design and fabrication of optical filters using organic materials, 59

Nitrides
spectroscopic investigations into plasma used for nitriding processes of steel and titanium, 115
Nuclear magnetic resonance
characterization of hydrogenated amorphous carbon films by nuclear magnetic resonance techniques, 102

Optical coatings
information about the microcrystalline structure from the IR reflection spectra of thin UV optical films: NdF_3 and MgF_2, 55
Optical properties
design and fabrication of optical filters using organic materials, 59
theoretical design and fabrication of a prism-coupled polarization conversion ferroelectric liquid crystal light modulator, 217
Optical spectroscopy
spectroscopic ellipsometry studies on ion beam sputter deposited $PB(Zr, Ti)O_3$ films on sapphire and Pt-coated silicon substrates, 15
Organic substances
adsorption and bulk diffusion of chlorine in monoclinic lead phthalocyanine thin film gas sensors, 225
design and fabrication of optical filters using organic materials, 59
Oxides
use of the ion beam current as a process control in the reactive sputtering of zirconium oxide, 48

Phase transitions
in situ transmission electron microscopy observation of the appearance and disappearance of channels in Al–Mn thin films, 108
Physical vapour deposition
crystallographic texture and morphology of obliquely deposited Co–Cr magnetic thin films on flexible polymeric substrates, 199
Plasma processing and depositon
spectroscopic investigations into plasma used for nitriding processes of steel and titanium, 115
Polymers
organic thin films on silicon in making a rectifying junction, 45
preparation and properties of amphiphilic polythiophene Langmuir–Blodgett films, 65

Reactive sputtering
effect of reactive gas mass flow on the composition and structure of AlN films deposited by reactive sputtering, 121
Reflection spectroscopy
information about the microcrystalline structure from the IR reflection spectra of thin UV optical films: NdF_3 and MgF_2, 55
theoretical design and fabrication of a prism-coupled polarization conversion ferroelectric liquid crystal light modulator, 217
Resistivity
resistance changes in thin film integrated circuits caused by interdiffusion, 183
Rutherford backscattering spectroscopy
effect of water vapor on the growth of aluminum oxide films by low pressure chemical vapor deposition, 156

Scanning electron microscopy
effect of water vapor on the growth of aluminum oxide films by low pressure chemical vapor deposition, 156
Schottky barrier
organic thin films on silicon in making a rectifying junction, 45
Sensors
adsorption and bulk diffusion of chlorine in monoclinic lead phthalocyanine thin film gas sensors, 225
stability and stabilization of immunoglobulin G Langmuir–Blodgett films, 70
theoretical design and fabrication of a prism-coupled polarization conversion ferroelectric liquid crystal light modulator, 217
Silicon
effect of annealing on the surface and interface properties of indium oxide–silicon structures, 39

organic thin films on silicon in making a rectifying junction, 45
quasi-static and high frequency $C-V$ measurements on $Al/Ta_2O_5/SiO_2/Si$, 145
Silicon oxide
electrical properties of thin reoxidized dual-layer oxides, 150
role of the buffer gas in the ArF laser chemical vapour deposition of silicon oxide, 35
Sputtering
preparation and characterization of $YBa_2Cu_3O_{7-x}$ high T_c superconducting thin films deposited by S-gun sputtering, 179
use of the ion beam current as a process control in the reactive sputtering of zirconium oxide, 48
Steel
spectroscopic investigations into plasma used for nitriding processes of steel and titanium, 115
Structural properties
characterization of hydrogenated amorphous carbon films by nuclear magnetic resonance techniques, 102
effect of reactive gas mass flow on the composition and structure of AlN films deposited by reactive sputtering, 121
infrared study of solids and cast films of long-chain fatty acids, 203
Superconductivity
preparation and characterization of $YBa_2Cu_3O_{7-x}$ high T_c superconducting thin films deposited by S-gun sputtering, 179
Surface and interface states
organic thin films on silicon in making a rectifying junction, 45
Surface energy
thin film characteristics of fluorine-substituted monolayers prepared by chemical adsorption from solution, 209
Surface morphology
corrosion resistant coatings (Al_2O_3) produced by metal organic chemical vapour deposition using aluminium–tri-*sec*-butoxide, 138
Surface structure
infrared study of solids and cast films of long-chain fatty acids, 203

Tantalum
quasi-static and high frequency $C-V$ measurements on $Al/Ta_2O_5/SiO_2/Si$, 145
Tin
microstructure of pulsed laser irradiated Sn and Ge-50 at.%Sn thin films on Ge single crystal substrates, 167
Titanium nitride
spectroscopic investigations into plasma used for nitriding processes of steel and titanium, 115
Transmission electron microscopy
in situ transmission electron microscopy observation of the appearance and disappearance of channels in Al–Mn thin films, 108
microstructure of pulsed laser irradiated Sn and Ge-50 at.%Sn thin films on Ge single crystal substrates, 167
transmission electron microscopy of annealed a-$Si_{1-x}C_x$:H/Al films with different Al grain sizes, 160
Tunnelling
tunnelling in Al–silicon oxynitride–Si structures, 133

X-ray diffraction
preparation and properties of amphilic polythiophene Langmuir–Blodgett films, 65
X-ray photoelectron spectroscopy
effect of water vapor on the growth of aluminum oxide films by low pressure chemical vapor deposition, 156
X-ray reflectivity
density, thickness and interface roughness of SiO_2, TiO_2 and Ta_2O_5 films on BK-7 glasses analyzed by X-ray reflection, 191

Zirconium
use of the ion beam current as a process control in the reactive sputtering of zirconium oxide, 48
